

AQUAGARD®

WATERBASE Bottom Paint

Value You Can Trust

*** America's Bottom Paint SM ***

AkzoNobel

Top Quality, Easy to Apply Hull Protection

For fiberglass and wooden boats

AQUAGARD antifouling bottom paint uses proven formulation to give your boat a protective coating strong enough to handle tough marine environments for multiple boating seasons. Yet its unique waterbased formulation makes it easy to apply and clean up with no toxic fumes in the process. AQUAGARD is compatible with most of today's bottom paints making it the ideal cost-effective alternative for overcoating existing antifouling paints. It comes in four popular colors and is available in quart, gallon, and two-gallon containers. So, no bottom job is too big or small for AQUAGARD to handle.

Tough on Fouling, Easy on the Air

Because AQUAGARD is waterbased, there is no harsh solvent smell and fumes during application. It exceeds V.O.C. standards for boat paint set by the strictest of municipalities, making AQUAGARD the ideal solution for painting your boat indoors and out.

Cleaner Hulls & Cleaner Cleanup

Don't Forget Your Dinghy

AQUAGARD is great for use on inflatable dinghies and rigid inflatable boats (RIB). It applies directly to common inflatable boat hull types* including Hypalon, polyvinyl chloride, and polyurethane without the use of primer. Giving antifouling protection to inflatable sport boats, rescue craft, safety boats, dive boats and tenders. It is even available in a Shark White color which blends seamlessly with most inflatable hulls.

*Please note that AQUAGARD contains copper as a biocidal element which is not compatible with aluminum hulls. In the case of aluminum hulls, a barrier coat primer is required.

- Ablative action repels barnacles and other growth
- Fast drying with non-toxic fumes
- U.S. EPA approved

AQUAGARD®

The Protection You Need

AQUAGARD dries to a smooth, durable finish that lasts. It stands up to routine use like beaching, trailering, and launching. Its special chemistry accommodates unlimited time between painting your boat and launching it. This feature gives you the option of repainting your bottom as part of the winterization routine. So, you can skip painting and be the first-to-launch the next season.

Polishing Action Keeps Your Hull Clean

AQUAGARD is an abrasive paint. Its self-polishing surface wears away as your boat moves to expose fresh copper which is embedded in the paint film. This action repels barnacles and other marine growth constantly and minimizes the need for hard sanding when it is time to recoat your boat's bottom.

AQUAGARD®

Your Complete Solution for an Easy Bottom Job

AQUAGARD Bottom Paint

- Great value with outstanding results
- Fast drying
- Waterbased – rolls on easily
- Soap & water cleanup

190 Primer

- Waterbased primer
- Excellent resistance to corrosion & saltwater
- Improves adhesion of AQUAGARD Bottom Paint

180 Wash & Dewaxer

- Formulated to strip mold release from fiberglass surfaces
- Removes grease and wax from gelcoat and aluminum
- Smooths surface for paint applications

Four Popular Colors

Black
