

Overcoating VC 17m?

Recommended Antifouling Products from Interlux®

Overcoating Recommendations

- First, thoroughly remove any fouling with a high-pressure freshwater wash
- Wet sand the aged VC 17m with 120 grit sandpaper and remove sand residue from the surface
- Overcoat with two coats of Micron CSC - CA, Bottomkote - CA or three coats of VC Offshore

Note: Remove oil and grease stains from the hull surface with Special Thinner 216 before applying the first coat of new antifouling.

Micron CSC – CA

Multi-season antifouling paint based on Controlled Solubility Copolymer technology. This product is designed to wear away (polish) at a controlled rate providing multi season protection with reduced paint buildup allowing for an easier reapplication and improved performance.

Product Features

- Provides excellent multi-season longevity against all types of algae, weeds, barnacles, and other shell fouling
- Apply at temperatures as low as 41°F / 5°C, improving productivity at cooler Fall / Spring temperatures
- High Solids formulation makes it easier to achieve film thickness with a reduction in VOC

Bottomkote – CA

Bottomkote – CA provides excellent season-to-season protection, enabling the antifouling paint to wear away with use and eliminates the build-up of old spent coatings and the heavy sanding needed to remove them.

Product Features

- Flexible application schedule – apply at low temperatures
- Compatible over most antifouling
- Suitable for power and sail, in all waters

VC Offshore

VC Offshore is a hard antifouling tailored for high performance or racing sail and power boats. Formulated with a fluoro-microadditive that creates a hard, smooth and low-friction surface which can be polished to achieve a very low profile with maximum durability.

Product Features

- Provides a hard, smooth racing finish
- Can be polished to achieve a low profile and minimum drag
- Suitable for use in both fresh and salt water

Relentless performance, for every boat, everywhere, every time.

It's what's under the surface that counts

So much more than just bottom paint

Introducing Micron® CSC- CA, our newest multi-seasonal bottom paint that delivers excellent protection against all types of fouling. Designed to polish away at a controlled rate, it keeps your bottom clean and can improve boat handling and performance in all waters, from fresh water to salt water.

Like you, we have a passion for boating. We provide boaters and boatyards the hull protection they deserve with over 140 years of cutting-edge science, technology and expertise. So you can expect only the best from every Interlux® yacht paint product. Our bottom paints not only protect your hull from fouling, they also protect against the spread of invasive species, safeguarding local waters and helping you enjoy boating with peace of mind.

**Relentless performance and protection
for every yacht, everywhere, every time.**
